

Double Solid White Lines

Double solid white lines indicate a lane barrier between a regular use and a preferential use lane, such as a carpool (HOV) lane. You may also see double solid white lines in or near freeway on and off ramps. Never change lanes over double solid white lines. Wait until you see a single broken white line.

Broken White Lines

Broken white lines separate traffic lanes on roads with two or more lanes in the same direction.

End of Lane Markings

Ending freeway and street lanes are usually marked with large broken lines. If you are driving in a lane marked with broken lines, be prepared to exit the freeway or for the lane to end. Look for a sign that tells you to exit or merge.

Yield Line

A yield line is a line of solid white triangles that shows approaching vehicles where to yield or stop. The triangles point towards approaching vehicles.
