Right Turns

To make a right turn:

- Drive close to the right edge of the road.
 - If a designated right turn lane is available, enter at the opening.
 - You can drive in a bike lane within 200 feet from the turn. Check for bicyclists in your blind spots.
- Watch for pedestrians, bicyclists, or motorcyclists between your vehicle and the curb.
- Start signaling about 100 feet before the turn.
- Look over your right shoulder and reduce your speed.
- Stop behind the limit line. A limit line is a wide white line that shows the drivers where to stop before an intersection or crosswalk. If there is no limit line, stop before you enter the crosswalk. If there is no crosswalk, stop before you enter the intersection.
- Look both ways (left-right-left) and turn when it is safe.
- Complete your turn in the right lane. Do not turn wide into another lane.

Example of a right turn.

Right Turn Against a Red Light

You may turn right at a red light after a complete stop unless there is a NO TURN ON RED sign. Follow the same steps listed above for right turns.

Right Turn Against a Red Arrow

You may not turn right if you are stopped at a red arrow light. Wait until the light changes to green before making your turn.

Right Turn at a Public Transit Bus Lane

It is illegal to drive, stop, park, or leave a vehicle in an area designated for public transit buses. Signs will be posted to indicate the lanes are for bus only use. However, you may cross a bus lane to make a right turn.
