

Right Turn onto a Road with a Dedicated Lane

A dedicated right turn lane does not merge into another lane and allows you to make a right turn without stopping. You may make your turn even if there is a red light for vehicles going straight through the intersection. If there is a traffic light or sign on the right curb of the right turn lane, you must obey that light or sign. Always yield to pedestrians in a crosswalk when turning.

Left Turns

To turn left:

- Drive close to the center divider or into the left turn lane.
 - Enter a designated left turn lane at the opening. Do not cross any solid line.
 - Enter a two-way center left turn lane within 200 feet of the turn. Respect the right-of-way of any vehicle, bicyclist, or motorcyclist already in the lane. Always yield to pedestrians.
- Start signaling 100 feet before the turn.
- Look over your left shoulder and reduce your speed.
- Stop behind the limit line. If there is no limit line, stop before you enter the crosswalk. If there is no crosswalk, stop before you enter the intersection.
- Look both ways (left-right-left) and begin your turn when it is safe.
- Proceed into the intersection while turning to complete your turn in the left lane.
- Do not turn the steering wheel too soon and enter the lane of oncoming vehicles.
 - Keep your wheels pointed straight ahead until it is safe to start your turn. If your wheels are pointed to the left and a vehicle hits you from behind, you could be pushed into oncoming traffic.
- Accelerate smoothly during and after the turn.
- Allow the steering wheel to straighten in the new lane.

Example of a left turn.
