

Left Turn Against a Red Light

You may turn left against a red light when you are turning from a one-way street onto a one-way street. Make sure there is no sign prohibiting the turn. Yield to other vehicles, pedestrians, or bicyclists who have a green light. Look both ways and turn when it is safe.

U-TURN

A U-turn is when you turn your vehicle around to go back in the direction you came. To make a U-turn, signal and use the left turn lane or far-left lane. You may make a U-turn:

- Across a double yellow line.
- In a residential district if no vehicles are approaching you within 200 feet.
- At an intersection on a green traffic light or green arrow, unless a NO U-TURN sign is posted.
- On a divided highway if a center divider opening is provided.

Never make a U-turn:

- Where a NO U-TURN sign is posted.
- At or on a railroad crossing.
- On a divided highway by crossing a dividing section, curb, strip of land, or two sets of double yellow lines.
- When you cannot see clearly for 200 feet in each direction.
- On a one-way street.
- In front of a fire station. **Never** use a fire station driveway to turn around.
- In business districts (the part of a city or town where most offices and businesses are).
 - Except at an intersection, or on a divided highway where an opening has been provided.
