

LEFT TURN FROM TWO-WAY ROAD INTO TWO-WAY ROAD:

Approach the turn from the right half of the roadway closest to the center. Try to use the left side of the intersection to help make sure that you do not interfere with traffic headed toward you that wants to turn left. Keep to the right of the centerline of the road you enter, but as close as possible to the center line. Be alert for traffic heading toward you from the left and from the lane you are about to go across. Motorcycles headed toward you are hard to see and it is difficult to judge their speed and distance away. Drivers often fail to see a motorcycle headed toward them and hit it while they turn across a traffic lane.

LEFT TURN FROM TWO-WAY ROAD INTO ONE-WAY ROAD:

Approach the turn from the right half of the roadway closest to the center. Make the turn before you reach the center of the intersection and turn into the left lane of the road you enter.

LEFT TURN FROM TWO-WAY ROAD INTO FOUR-LANE HIGHWAY:

Approach the turn from the right half of the roadway closest to the center. Enter the left lane, to the right of the center line. When traffic permits, you can move out of the left lane.

U-TURNS

A “U-turn” is any turn you make so you can proceed in the opposite direction.

Do not try a U-turn on a highway unless absolutely necessary. If you must turn around, use a parking lot, driveway or other area, and, if possible, enter the roadway as you move forward, not backing up.

You can make a U-turn only from the left portion of the lane nearest to the centerline of the roadway, never from the right lane. Unless signs tell you otherwise, you can make a U-turn when you get permission to proceed by a green arrow left turn traffic signal, provided it is allowed and you yield to other traffic.

You cannot make a U-turn near the top of a hill, a curve or any other location where other drivers cannot see your vehicle from 500 feet (150 m) away in either direction. U-turns are also illegal in business districts of New York City and where NO U-TURN signs are provided. You can never make a U-turn on a limited access expressway, even if paths connect your side of the expressway with the other side. In addition, it is prohibited for a vehicle to make a U-turn in a school zone.

Unless prohibited, a three-point turn can be used to turn around on a narrow, two-way street. You may be required to make a three-point turn on your road test.
