

- Look carefully behind your vehicle for approaching pedestrians, especially small children, before backing up.
- For maximum visibility, keep your windshield clean and headlights on.
- Be responsible: Pedestrians have the right of way at all crosswalks. Yield to pedestrians at all crosswalks and intersections, whether marked or unmarked.
- When there is no traffic control signal, drivers must yield the right-of-way to pedestrians, particularly if a pedestrian is in a crosswalk, or there is potential danger to the pedestrian.
- Every driver approaching an intersection or crosswalk must yield the right-of-way to a pedestrian.
- Drivers may be issued a tickets if they are involved in a crash with a pedestrian, injure a pedestrian/bicyclist or fail to exercise due care.
- Stop well back from the crossing to give other vehicles an opportunity to see the crossing pedestrians so they can stop too.
- Yield to pedestrians when making right or left turns at intersections.
- Expect that someone may be entering the roadway or crossing the street that may not see or hear you – expect that there may be persons with disabilities who may have hearing, sight or mobility challenges in and around crossings.
- Pay particular attention to pedestrians accompanied by a guide dog, using a white cane or other mobility assistive devices.
- Use extra caution when driving near children playing along the street or older pedestrians.
- Do not block or park in crosswalks.
- Always stop for a school bus with flashing red lights. Never pass or overtake a vehicle that is stopped for pedestrians. There may be people crossing where you can't see.
- Obey speed limits and come to a complete stop at STOP signs.
- Use extra caution when driving in hard-to-see conditions, such as nighttime or bad weather.
- Slow down and be prepared to stop when turning or otherwise entering a crosswalk.
- Be extra cautious when backing-up and look for pedestrians.
- Be aware of your vehicle's a-pillars (vertical supports on the vehicle that are located around all glass) as these may interfere with seeing clearly (they can create blind spots!)
- Never pass vehicles stopped at a crosswalk. There may be people crossing where you can't see.
- Follow the speed limit, especially around people on the street, in school zones, in neighborhoods where children are present and as you approach an intersection.

BICYCLISTS

Bicyclists have the right to share the road and travel in the same direction as motor vehicles. They are often hard to see in traffic and have no protection from a traffic crash. Check your “blind spots” before you make a turn, parallel park, open a door or leave a curb. Do not depend only on your mirrors – turn your head to look for bicyclists, skaters and scooter operators that may be next to you or approaching.

Give bicyclists room when you drive. Reduce speed as you pass them. Air pressure from a vehicle that passes them quickly can send them off balance.
