

Be aware that the bicyclist near or in front of you can react to road hazards like a motorcyclist would with sudden changes of speed, direction or lane position.

Bicyclists must:

- Ride in a bicycle lane, if available. Where there is none, they must remain near the right curb or edge of the road or on a right shoulder of the road, to prevent interference with other traffic. When they prepare for a left turn or must move left to avoid hazards, cyclists do not have to remain to the right.
- Come to a full stop before they enter a roadway from a driveway, an alley or over a curb.
- Never travel with more than two side-by-side in a single lane.
- Never ride on a sidewalk if it is prohibited by local laws.

Bicyclists and their passengers ages 1 - 13, must wear an approved helmet. Adults must obey any local laws or regulations about helmet use.

Bicyclists also must:

- Signal turns, lane changes and stops through the use of the hand signals shown. A bicyclist can signal a right turn when they extend the right arm straight out to the right.
- Never carry an infant under a year old as a passenger. It is against the law. Child passengers ages 1 - 4 must ride in attached bicycle safety seats.
- Never carry a passenger unless the bicycle has a passenger seat.
- Keep at least one hand on the handlebars at all times and do not carry any item which prevents correct control of the bicycle.
- Any bicycle crash that causes death or serious injury must be reported to DMV within 10 days of the incident. Bicycle accident report forms (MV-104C) are available at any motor vehicle office.

A bicycle driven on public highways must have adequate brakes and a horn or bell that can be heard at least 100 feet (30 m) away. A bicycle used at night must have a headlight visible from at least 500 feet (150 m) ahead and a red taillight visible from at least 300 feet (90 m) behind. One of these lights must be visible from at least 200 feet (60 m) away on each side. A bicycle sold by a dealer must have wide-angle, spoke-mounted reflectors or reflective tires, a wide-angle rear reflector and pedal reflectors.

The rules of the road and right-of-way apply to and protect these and other highway users. You must yield the right-of-way to them just as you would to another vehicle. And they must obey the rules of the road just as motor vehicle drivers do.

Tips for Drivers:

- People on bicycles have the same rights and responsibilities as people behind the wheel of a motor vehicle.
- Drivers must be alert to the presence of bicyclists and drive responsibly to avoid colliding with them or encroaching on their rightful path of travel.
- Yield to bicyclists as you would other drivers and do not underestimate their speed. This will help avoid turning in front of a bicyclist traveling on the road or sidewalk, often at an intersection or driveway.
- Give bicyclists extra space.
- Make sure bicyclists see you.
- In parking lots, at stop signs, when backing up, when parking, and before opening your door, search your surroundings for people, bicycles and other vehicles.
