

- Learn to recognize common hand signals used by bicyclists to indicate right and left turns and stopping.
- Drivers turning right on red should look to the right and behind to avoid hitting a bicyclist approaching from the right rear. Stop completely and look left-right-left and behind before turning right on red.
- Obey the speed limit, reduce speed for road conditions and drive defensively to avoid a crash with a cyclist.
- Give cyclists room. Do not pass too closely. Pass bicyclists as you would any other vehicle—when it's safe to move over into an adjacent lane. Look before getting out of your parked vehicle; avoid opening your door into the path of an oncoming bicyclist.
- When passing, reduce speed. Air pressure from your vehicle can send them off balance.
- Be aware that the bicyclist near or in front of you can react to road hazards like a motorcyclist would with sudden changes of speed, direction, or lane position.
- Learn to recognize designated bicycle lanes, bike boxes, 2-way cycle tracks, green painted cycle lanes and other roadway modifications designed for bicyclists to operate safely and efficiently. Drivers are prohibited from operating in these dedicated spaces and must be aware of how bicyclists operate in and around these spaces.
- Bicycle lane – a marked lane dedicated for use by bicycles.
- 2-way cycle track – a marked bicycle lane that allows travel in both directions, similar to a sidewalk for pedestrians.
- Bike Box – a marked area at an intersection, ahead of where traffic is required to stop. This area provides extra space for bicyclists. Some bike boxes extend across the entire intersection and function similar to a crosswalk for pedestrians.

- Green painted bike lanes are used to increase visibility to cyclists in some high traffic areas.

The rules of the road and right-of-way apply to and protect bicyclists and other roadway users. You must yield the right-of-way to them just as you would to another vehicle. Bicyclists must also obey the rules of the road the same as a motor vehicle driver but as a driver you must anticipate that they will not follow the rules of the road.

IN-LINE SKATERS, SKATE BOARDERS AND NON-MOTORIZED SCOOTERS

As with pedestrians and bicyclists, other road users such as in-line skaters, skateboarders and non-motorized scooters are vulnerable to the careless actions of motor vehicle drivers. Motor vehicle operators are responsible for safe and lawful operation of the vehicles they drive. It is important for you, as a driver, to do everything possible to respect the safety of all road users, including in-line skaters, skateboarders and non-motorized scooters. You as the driver are responsible to exercise due care by being aware, alert, and driving defensively.

Just as you would when keeping an eye out for pedestrians and bicyclists, pay attention to the presence of other road users and exercise due care. Pay particular attention when you observe in-line skaters, skateboarders and non-motorized scooters operating along the roadside, in a designated bike lane, when approaching intersections and at crosswalks.

MOTORCYCLISTS

As a driver, you share the road with a lot of other motorists – not all of which are driving cars or trucks. Motorcycles are common on New York roads. As a driver, you are responsible to be aware of motorcycles and understand how to safely share the road with them.

Motorcyclists have the same rights and responsibilities as drivers of other vehicles, and must follow the same traffic laws as pedestrians, bicyclists and skaters. Though you may often see
