

Chapter 5: Signals, Signs, and Markers

Traffic Signals

Traffic signals help provide for the orderly movement of traffic. Drivers must obey these signals, except when a law enforcement officer is directing traffic. You must obey a law enforcement officer at all times when they are directing traffic even if he/she is telling you to do something which is ordinarily considered against the law.

Steady Red Light (Stop)

Stop before entering the crosswalk or intersection. You may turn right unless prohibited by law. You may also turn left if both streets are one way, unless prohibited by law. You must yield to all pedestrians and other traffic lawfully using the intersection.

A Flashing Red Light

Stop completely before entering the crosswalk or intersection, then proceed when you can do so safely. Vehicles on the intersecting road may not have to stop.

Steady Yellow Light (Caution)

A steady yellow light warns drivers to use caution and to alert them the light is about to change to red. You must STOP before entering the nearest crosswalk at the intersection if you can do so safely. If a stop cannot be made safely, then you may proceed cautiously through the intersection before the light changes to red.

A Flashing Yellow Light

A flashing yellow light warns drivers to slow down and proceed with caution.

A Flashing Yellow Arrow For Left-Turns

A flashing yellow arrow allows a driver to turn left, but the driver must yield the right-of-way to oncoming traffic.

Steady Green Light (Go)

A steady green light means the driver can proceed on a green light if it is safe to do so. You may drive straight ahead or turn unless prohibited by another sign or signal. Watch for cars and pedestrians in the intersection. Be aware of reckless drivers who may race across the intersection to beat a red light.

Green Arrow Displayed at the Same Time as a Red Light

A green arrow displayed at the same time as a red light means the driver can proceed carefully in the direction of the arrow after yielding the right-of-way to other vehicles and pedestrians.

Left Turn on Green

You can turn left on a green light. However, you must yield the right-of-way to all traffic that is approaching from the opposite direction before turning.

Traffic Signs

Traffic signs can help you to be a better driver because they:

1. Warn of hazards ahead that are difficult to see
2. Guide drivers to their destination by identifying the route
3. Inform of local regulations and practices
4. Regulate the speed and movement of traffic
