

The *Standard Colors* table shows colors commonly used on road signs and explains what each color means.

Table 16: Standard Colors

Color	Description
	Red: Stop, yield, or do what is posted on the sign
	Green: Indicated movements permitted, direction guidance
	Blue: Motorist services guidance
	Yellow: General warning or caution
	Black: Regulation
	White: Regulation
	Orange: Construction and maintenance warning
	Orange (Retroreflective): Used on various types of signs
	Brown: Public recreation and scenic guidance

Knowing the shapes of these signs will help you know what to do when you are approaching from a distance.

Table 17: Signs by Shape

Shape	Description
	Octagon: Exclusively for stop signs
	Horizontal Rectangle: Generally for guide signs
	Equilateral Triangle: Exclusively for yield signs
	Pennant: Advance warning of no pass zones
	Diamond: Exclusively to warn of existing or possible hazards on roads or adjacent areas.
	Vertical Rectangle: Generally for regulatory signs.
	Pentagon: School advance and school crossing signs.
	Round: Railroad advance warning signs.

Warning Signs

Warning signs alert drivers to conditions that are immediately ahead and tell them what to look for. There may be road hazards, changes in direction, or some other situation you should know about. Not only must warning signs be observed for safety reasons but to disregard them may be a traffic violation.

When you encounter a warning sign:

1. Pay attention
2. Follow instructions
3. Reduce speed to at least the posted speed signs
