

Solid and Broken Lines

A solid yellow line on your side of the road marks a “no-passing zone.” Broken or dashed lines permit you to pass or change lanes, if safe.

Crosswalks

White crosswalk lines are painted across a road to indicate pedestrian crossing areas. Pedestrians should use these areas when crossing the road. At intersections where stop lines are missing, you must stop before the crosswalk when required to stop by traffic signs, traffic signals, or pedestrians in the crosswalk.

White Stop Lines

White stop lines are painted across the pavement lanes at traffic signs or signals. Where these lines are present, you are required to stop behind the stop line.

Solid Lines

Solid white lines are used for pavement edge lines, shoulder markings, channelizing, transitions, and lane use control. Crossing a solid white line should be avoided if possible. The solid yellow line on the left edge of the road is a guide for drivers to indicate driving to the left of the yellow line is prohibited. This type of yellow line can be found on interstate highways.

Crossing is prohibited where there is a pavement marking of double solid white lines.
