

Barrels

Barrels that are engineered to act as an impact cushion reduce the seriousness of crashes. These barrels are usually installed in front of a solid obstacle and in areas of high crash frequency.

Hearing Impaired

If you see this flag on the back of a bicycle, slow down, as the bicycle operator may be hearing impaired. This sign may also be displayed on vehicles to alert others the driver may be hearing impaired.

Construction and Maintenance Devices

Various traffic control devices are used in construction and maintenance work areas to direct drivers, bicyclists, or pedestrians safely through the work zone and to provide for the safety of the workers.

The most commonly used traffic control devices are signs, barricades, vertical panels, drums, cones, tubes, flashing arrow panels, and flag individuals. Orange is the basic color for these devices.

When you are in a construction and maintenance work area, be prepared:

- 1. To slow down or stop as you approach workers and equipment
- 2. To change lanes
- 3. For unexpected movements of workers and equipment

Special Note:
Traffic fines double for violations that occur in construction zones where workers are present.

Construction and Maintenance Signs

Construction and maintenance signs are used to alert drivers of unusual or potentially dangerous conditions in or near work areas. Most signs in work areas are diamond shaped, but a few are rectangular.
