

Texas law specifically states:

1. You may not park in a disabled parking space unless the vehicle has a disabled license plate or state issued removable windshield identification card.
2. You may not use a disabled parking windshield identification card unless transporting the disabled person to whom it was issued.
3. You may not lend your windshield identification card to someone else.
4. You may not block an access or curb ramp.
5. You may not make, sell, possess, or display a counterfeit disabled parking windshield identification card, or alter a disabled parking windshield identification card.

Certain municipalities also prohibit stopping or standing in a disabled parking space unless a disabled parking windshield identification card is visible or the vehicle has a disabled license plate.

Do not park in striped areas adjacent to disabled parking spaces or in a striped area in front of an entrance to a business adjacent to a disabled parking space. Striped areas are for wheelchair lifts.

Unattended Motor Vehicle

It is illegal for any driver to permit their car to stand idling unattended without turning off the engine, locking the ignition, removing the key from the ignition, and setting the brake; and when standing on any grade, without turning the front wheels to the curb or side of the road.

The requirements regarding turning off the engine, locking the ignition, and removing the key do not apply to a driver who starts the engine by using a remote starter or other similar device that remotely starts the engine without the key in the ignition. Before the vehicle can be operated, the key must be placed in the ignition or must be physically present in the vehicle.

Parallel Parking

1. Choose a space large enough for your car to fit. Signal then stop even with the front of the car about two feet out from the space. To alert drivers who may be behind you be sure to signal before you pass the spot you want to parallel park in.

2. Make sure you will not interfere with oncoming traffic then turn your front wheels all the way to the right and back slowly toward the curb.

Special Note:
On a roadway that allows two-way traffic, the driver must park with the vehicle's right-hand wheels within 18 inches of the right-hand curb or edge of the roadway.
