

Bicycles Must Be Properly Equipped

1. Every bicycle must be equipped with a brake, which will enable the operator to make the wheels skid on dry, level, clean pavement when applied.
2. Hearing-impaired bicycle riders may display a safety flag.
3. Every bicycle used at nighttime must be equipped with:
 - a. A lamp on the front emits a white light visible from a distance of at least 500 feet in front of the bicycle, and
 - b. A red, DPS-approved reflector on the rear visible from distances of 50 feet to 300 feet. (A red light on the rear visible from a distance of 500 feet may be used in addition to the red reflector.)

Bicycle Safety Guidelines

1. You may be required by law to wear a helmet depending on your local laws.
2. When riding on pedestrian facilities, reduce speed and exercise caution.
3. Do not weave in and out of parked cars.
4. Move off the street to stop, park, or make repairs to your bicycle.
5. Select a route according to the rider's bicycling skill and experience.
6. Bicycles may be equipped with a mirror.
7. Wear light colored or reflective clothing to make it easier for drivers to see you.

Riding in Wet Weather

Water makes certain surfaces slick. Be aware of manhole covers and painted stripes on the road. Water also obscures some hazards. Watch for potholes filled with water. In addition, the visibility of motorists is greatly decreased in wet weather.
