

Solid Yellow

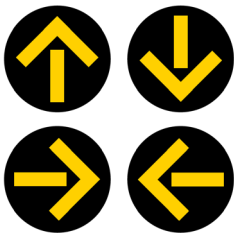

Slow down. This means the light is changing to red. When you see a yellow light, slow down and prepare to stop. If you're in the intersection when the yellow light comes on, continue through the intersection at the posted speed.

You are not allowed to accelerate beyond the posted speed limit to enter or clear an intersection when the light is yellow.

Flashing Yellow

Slow down. A flashing yellow light has the same meaning as a yield sign. Treat the intersection as an uncontrolled intersection. Proceed when you have the right-of-way.

Yellow Arrow

Slow down. A yellow arrow means the light is going to turn red soon. Prepare to stop and give the right-of-way to oncoming traffic.
