

COMMON SIGNS

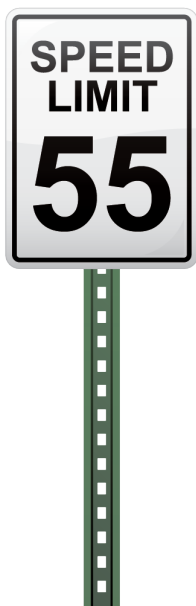

Stop

A stop sign means you must stop at the line, crosswalk, or corner. Look for crossing vehicles and pedestrians in all directions and yield the right-of-way.

Yield

A yield sign means you must slow down and allow traffic that has the right-of-way to cross first.

Speed Limit

These signs tell you the maximum safe speed allowed or the minimum safe speed required.

- The maximum speed limit is for ideal conditions. Reduce your speed when road conditions require it — like the roadway is slippery or it's foggy and difficult to see. Even if you're driving under the posted speed limit, you can get a ticket for traveling too fast for road conditions.
- Some roads have minimum speed limits. You're required to travel at least this fast so you are not a hazard to other drivers.

Keep Right

This sign reminds you to stay in the right lane unless you're passing another vehicle.
