

PERPENDICULAR AND ANGLED PARKING

Entering a perpendicular or angled parking space

1. Identify the space you want to park in, and check traffic.
2. Signal your intention to turn.
3. Move forward slowly, turning the steering wheel left or right as appropriate, until the vehicle reaches the middle of the space.
4. Center the vehicle between the painted lines.
5. Move to the front of the parking space, stop, and secure the vehicle.

Exiting a perpendicular or angled parking space

1. Check for traffic in all directions.
2. Continue to check traffic and move straight back until your bumper clears the vehicle parked beside you.
3. Turn the steering wheel sharply in the direction you want your vehicle to move.
4. Clear the parking space and stop. Move forward, accelerating smoothly and steering as needed to straighten the wheels.
